**BRIDGE REPAIRS ON NH ROUTE 33 IN GREENLAND**  
***OCCASIONAL LANE CLOSURES OVER THE WINNICUT RIVER***

The New Hampshire Department of Transportation announces bridge repairs are underway on the NH Route 33 bridge over the Winnicut River in Greenland.

These bridge deck and joint repairs are expected to take two months to complete. Two lanes of traffic will be maintained most of the time, but occasionally one lane of alternating traffic will be required. Warning signs, cones and flaggers will help guide motorists through the work zone.

Daily work hours will be 7:00 AM until 3:00 PM. The roadway and bridge will be open to two lanes of traffic at all times during non-work hours.
